Update on the Research and Innovation Priorities of the Hungarian EU Presidency

Ended

In October 2010, the European Commission published its communication on launching the Innovation Union, a Europe 2020 flagship initiative aimed at promoting the EU's competitiveness through the development of European innovation. The implementation of this initiative under the umbrella of the Europe 2020 strategy started under the Hungarian Presidency and opens a new chapter in this field.

22 - 23 February 2011
Barcelona/Spain

Strategic workshops

Foresight on Future Demand for Forest-based Products and Services: Scenario Building

Upon invitation only

The aim of the COST Strategic Workshop series 2010-2011 is to carry out a wide-angle foresight exercise on the future demand for multiple forest-based products and services. The project combines expert workshops and a collection of data and perceptions by means of internet-based tools.

Earth System Science and Environmental Management (ESSEM)
Forests, their Products and Services (FPS)

The ERRIN network – 10 years of growth

Ended

In 2001 the European Regions Research and Innovation Network (ERRIN) was set up as an informal network of regional offices in Brussels discussing research and innovation opportunities within EU programmes. Ten years on, the network is now an established, dynamic and successful Brussels-based network of 90 regions, engaging regional representation offices across Europe.

Fifth International Conference on Advanced Materials and Nanotechnology (AMN-5)

2011 is a most auspicious year marking the 100th anniversary of the discovery of superconductivity, and 25 years since high temperature superconductivity was first observed. 2011 has also been chosen as the International Year of Chemistry. This is intended as a worldwide celebration of the achievements of chemistry and its contributions to the well-being of humankind. The Fifth International Conference on Advanced Materials and Nanotechnology (AMN-5) offered a broad interdisciplinary overview of advanced materials and nanotechnology, and provided an exciting forum to discuss new and exciting advances in the field.

Chemistry and Molecular Sciences and Technologies (CMST)
Materials, Physics and Nanosciences (MPNS)

Academic Enterprise Awards Europe

The ACES, now in their third year, are the only pan-European awards for enterprise in university and public research institutes. They give public recognition to those researchers, engineers, professors, students and government officials in Europe who have done the most in 2010 to foster a culture of enterprise on campus. The awards culminate in a gala dinner and conference on academic enterprise.
