▶ **International Training School - Beyond Conventional Tissue Imaging**

Time: 05:01

The final meeting of COST Action BM1205 was organised at the Department of Physics of the University of Bari (Italy). Over the past 4 years, the network involved 28 countries, Israel and Australia. The network allowed over one hundred scientists and young researchers to move around the world, giving them the chance to meet and work with new teams in different laboratories. This event became increasingly interesting, having started as a small initiative for about 20 students. It gradually grew into a proper multi-event involving more than 60 students, 15 of them coming from all over Europe. Some of them explained why the conference was so important for their career.

▶ **European Cooperation in Science and Technology (COST) - what's in it for researchers?**

Time: 07:24

The European Cooperation in Science and Technology (COST) has been a building block of Europe's research for 45 years. It funds research networks across borders and spanning all scientific disciplines.

Because science is all about people, COST creates spaces where people are empowered and ideas can grow without limits. It connects people in high-quality networks that deliver value for money and opportunities to excel. This is a flexible and open approach focused on cooperation, which creates a unique dynamic. It creates a fertile ground for science to flourish.

Academia, industry, public and private sector laboratories work together in networks, sharing knowledge, leveraging diversity and pooling resources.

COST is now more relevant than ever. It is the perfect example of how governments can make a real difference, ensuring that cooperation optimises national investment in research and technology and unlocks the full potential of science.

▶ **Fergus McNeill discusses Offender Supervision in Europe on BBC Scotland 2016**

Time: 04:43

Fergus McNeill, Chair of COST Action IS1106 on Offender Supervision in Europe, discusses the Action's findings regarding the Scottish community supervision system with Shelley Jofre on Scotland 2016 (BBC -- March 14, 2016). The network recommends that supervision be proportionate with the crime committed and that unnecessary pain caused by supervision be minimised for the person subjected to supervision and for others affected by it.
