Europe's strategy for developing international cooperation in research and innovation

Earlier this week the European Commission has announced a strategy to further focus cooperation on EU strategic priorities, while maintaining the tradition of openness to third country participation in EU research. COST is working in this direction, and opens pan-European cooperation worldwide.

World Humanitarian Day

Every day humanitarian aid workers help millions of people around the world. World Humanitarian Day is celebrated on 19 August 2012 – it is a global celebration of the spirit of people helping people. Two COST Actions in the COST Domain for Individuals, Societies, Cultures and Health (ISCH) are of great significance to humanitarian issues.

Genetically Modified Trees Could Play Important Role in Combatting Climate Change, But Unified Policy and Regulation Approach Requirement To Address Public Concerns

12th July 2012 – Genetically Modified Trees (GMTs) plantations could play an important role in mitigating climate change and environmental pollution, but public concerns about the need and safety of genetically modified organisms requires the development of a unified approach in terms of policy and regulation for the environmental impact assessment and the safe development and practical use of GMTs according to speakers at a session organised by COST Action FP0905 'Biosafety of forest transgenic trees' which took place today at the Euroscience Open Forum in Dublin.
