Food and Agriculture (FA)

FA covers all aspects of research in the field of agricultural and food sciences in its widest sense. The primary aim of the Domain is to encourage networking of research in any field linked to these activities as well as the related demands and needs.

The Domain naturally encompasses a very wide number of subjects, and relates to a large number of areas of human activity.

The Domain actively seeks innovative and interesting proposals even if they may not at first sight fit neatly into a traditional category of research in food and agriculture.
