## Information and Communication Technologies (ICT)

**ICT covers scientific and technical research in all areas of information and communication science and technologies.**

The ICT research area is best summarised as treating the processing, transmission, storage, retrieval, management, usage, and exchange of information and knowledge, with emphasis on fundamental aspects and pre-competitive technology development.

New ideas and initiatives are welcome as well those with high interdisciplinary elements and close links and overlaps with other domains.

### Information

#### Domain Committee Members
