## Materials, Physics and Nanosciences (MPNS)

The Domain Materials, Physics and Nanosciences (MPNS) is home to material science, extending from conception through to production and includes characterization, examination, evaluation, fabrication and development, to actual application and service, as well as related databases, codes, standards and inspections.

The Domain thus also incorporates nanomaterials and nanosciences and the nanotechnological applications thereof. It also supports exploratory basic and applied research in physics, theoretical and experimental, as a key to understanding the laws governing the behaviour of matter and energy.

### Information

#### Domain Committee Members

- ▶ [Contact details of MPNS Domain Committee Members](#)

Visit the Who's Who section to find your contact person(s)
