Events

ECASIA'09 - 13th European Conference on Applications of Surface and Interface Analysis

Location	Antalya, Turkey
Date	18 - 23 October 2009
Calendar file	.vcs .ics

ECASIA conferences have covered all relevant developments in the field of surface analysis in the past 25 years. This year, the scientific programme included presentations on state-of-the-art equipment for surface analysis as well as corresponding accessories.

Understanding the surface properties of materials at the molecular level requires sophisticated, expensive and large research equipment working in a very high vacuum environment and under large electrical and/or magnetic fields. The meeting provided an excellent platform for an exchange between scientists from industry, academia, government and suppliers of equipment for surface analysis.
