

What is ISCH?

Individuals, Societies, Cultures & Health

ISCH supports the development of knowledge and insights for citizens, democratic debate and decision-making in the public, private and voluntary spheres.

In Detail

The following examples illustrate actual research within this Domain. The scope of the Domain is not restricted to these activities.

- **The development and behaviour of individuals and groups:** mind, cognition and complexity; language development; learning; creativity; socialisation; identities and attitudes; gender; vulnerability and resilience; decision-making and risk-taking, etc.
- **Social, economic, political, cultural, historical and technological structures and processes**, and how these persist and/or change: economic development; governance and citizenship; social cohesion; poverty and inequality; health and wellbeing; public safety and security; human impact on the environment; war and conflict; international and inter-group relations; risk and regulation; institutional and organisational frameworks; management; health systems and policies; families and parenting; inter-generational relations; education and skills development; labour markets; work and leisure; welfare regimes; demographic change and migration etc.
- **Cultural diversity and a common European future:** languages, literatures, music and art; regional/national histories and European history; media and communication; values continuity and change; people and landscapes/cityscapes; location and spatial variation; cultural heritage; cultures of food and drink; philosophies of humans, nature, science and society; everyday cultures, etc.

Inter-disciplinary topics linking social science/humanities perspectives with the natural, medical and engineering sciences are particularly welcomed by this Domain, provided that the social science/humanities aspect is predominant.

Success Stories

COST Action IS0602 International Law in Domestic Courts built an interactive web-based database to explain how different jurisdictions handle similar questions of international law.

In the process, it has informed, educated and disseminated domestic applications of international law to a wider audience.

COST Action IS0603 Health and Social Care for Migrants and Ethnic Minorities in Europe (HOME) has linked similar research projects in different countries.

By gaining new insight into the causes of ill-health, this Action is helping Europe cope with the influence of migrants population on current social and healthcare services.

How to join a COST Action

Scientists interested in joining an ongoing COST Action should contact the Action Chair and the COST National Coordinator in their member country (www.cost.eu/cnc).

To propose a new Action, visit: www.cost.eu/opencall. COST assesses new proposals two times a year.

COST is supported by the EU RTD Framework Programme

ESF provides the COST Office through a European Commission contract
