RUNNING ACTIONS LED BY SERBIA

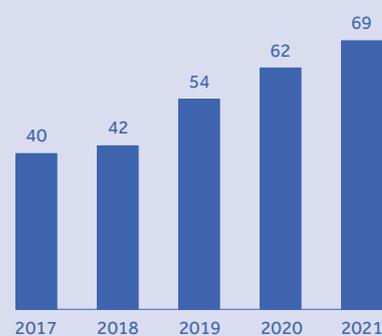

Examples of Chaired and Vice Chaired Actions

- Risk-based meat inspection and integrated meat safety assurance
- Research network for including geothermal technologies into decarbonized heating and cooling grids
- New approaches in detection of pathogens and aeroallergens
- Plasma applications for smart and sustainable agriculture
- Pan-European Network for Climate Adaptive Forest Restoration and Reforestation
- Connecting Education and Research Communities for an Innovative Resource Aware Society
- Plastics monitoring detection Remediation recovery
- FAIR Network of micrometeorological measurements

PRIRODNA ULJA U MESTO ANTIBIOTIKA: Profesor u Novom Sadu uveliko rade na jedinstvenom istraž

Branika Boršarijević
28.09.2021. 13:22

REZISTENCIJA na antibiotike predstavlja globalni zdravstveni problem i jedna je od najvećih pretnji za bezbednost hrane, zdravlje ljudi i životinja.

Foto: P. LENC

Se željom da se utiče smanjenje upotrebe antibiotika, a posleđno i otpornosti na ove lekove kako kod životinja, tako i kod ljudi, tim naučnika sa Univerziteta u Novom Sadu uveliko radi na projektu "Info Bomat", koji finansira Fond za nauku Srbije. Cilj je stvaranje novog, biljnog preparata, na bazi etarskih ulja, koji će se koristiti u prevenciji i terapiji mastitisa kod krava.

U razgovoru za "Novosti" dr Zorana Kovačević, rukovodilac projekta sa Poljoprivrednog fakulteta u Novom Sadu, kaže da je suština "Info Bomata" uvođenje fitoterapije u veterinarsku medicinu, budući da se najveći procenat prodatih antibiotika u svetu koristi za lečenje životinja, koji tako ulaze i u lanac ishrane.

CA18217 - NATURAL OILS INSTEAD OF ANTIBIOTICS: Professors from the University of Novi Sad are working hard on unique research

I would advise all young researchers to participate in COST. It's a great opportunity to connect with scientists at all levels of expertise, from Europe and beyond, and build a strong network of people with a well-established tradition of working together.

Mr Goran Tmušić, PhD student, MSc Biology, research trainee, Faculty of Sciences, Department of Biology and Ecology, University of Novi Sad
