*COST helps increase an institution's international visibility. Our university participates in 11 COST Actions in different areas (veterinary medicine, social sciences, applied mathematics) and these projects are very important for the general ranking of the university and the development of researchers' networks. COST's STSMs, Training Schools, and ITC Conference Grants are really important for young researchers and offer real opportunities to develop skills and write papers. Finally, COST Actions also generate further research by creating opportunities to participate in new projects.*
